

AMENDMENTS TO THE CLAIMS

1-11. (Cancelled)

12. (Currently amended) A composition comprising 1,1,1,3,3-pentafluorobutane and more than 5 % of weight of at least one non-flammable fluoro compound presenting no flash point according to ISO standard 1523, ~~selected from perfluorocarbons and fluoroamines and wherein said fluoro compound is a fluoroamine.~~
13. (Previously presented) The composition according to Claim 12, further comprising at least one non-fluoro organic solvent.
14. (Previously presented) The composition according to Claim 13, in which the non-fluoro organic solvent is a hydrocarbon, halohydrocarbon, aliphatic ester, aromatic ester, ketone, alcohol or ether.
15. (Previously presented) The composition according to Claim 14, in which the non-fluoro organic solvent is ethyl acetate, 1,2-dichloroethylene, methanol, ethanol, isopropanol or isobutanol.

16. (Previously presented) The composition according to Claim 13, comprising 1,1,1,3,3-pentafluorobutane and the non-fluoro organic solvent in proportions in which they form an azeotrope or a pseudo-azeotrope.

17. (Previously presented) The composition according to Claim 12, further comprising a surfactant.

18. (Previously presented) The composition according to Claim 17, wherein said surfactant is an imidazoline or alkylbenzenesulphonate type.

19. (Currently amended) The composition according to Claim 12, wherein said ~~nonflammable fluoro compound~~ fluoroamine compound is perfluorotriethylamine, ~~perfluoropentane or perfluorohexane~~.

20. (Currently amended) The composition according to Claim 12, comprising 1,1,1,3,3-pentafluorobutane and at least one said fluoroamine compound ~~perfluorocarbon~~ in proportions in which they form an azeotrope or a pseudo-azeotrope.

21 -23 cancelled

24. (Previously presented) A solvent which comprises the composition according to Claim 12.

25. (Previously presented) A degreasing solvent which comprises the composition according to Claim 12.

26. (Previously presented) A drying agent which comprises the composition according to Claim 12.

27. Previously presented) A toner-fixing agent which comprises the composition according to Claim 12.

28. (Previously presented) A refrigerant which comprises the composition according to Claim 12.

29. (Previously presented) A heat exchange fluid which comprises the composition according to Claim 12.

30. (Previously presented) A composition according to Claim 12, which comprises an effective amount of non-flammable fluoro compound which makes the composition non-flammable.

31. (Previously presented) A composition according to Claim 12, wherein the number of fluorine atoms divided by the number of hydrogen atoms in the molecule of the nonflammable fluoro compound is greater than 2.

32- 34 cancelled

35. (New) A method of removing water adsorbed onto a solid surface of an object after an aqueous treatment which comprises immersing the object in the drying agent as claimed in claim 26.

36. (New) A method of removing grease adsorbed onto a metal component which comprises immersing the component in the degreasing agent as claimed in claim 25.

37. (New) A method for fixing a toner particles on a support which comprises fixing the toner-fixing agent as claimed in claim 27

38. (New) A method for refrigerating which comprises using the composition as claimed in claim 12 as a refrigerant.

39. (New) The method according to Claim 38, wherein the composition is used as a product to replace a chlorofluorocarbon selected from CFC-11 (trichlorofluoromethane) and CFC-113 (1,1,2-trichlorofluoroethane).

40. (New) A method for exchanging heat which comprises using the composition according to Claim 12 as a heat exchanger fluid.
